

AIGI 26SC

AIGI 26 with Single Silicone Rubber Core

AIGI 26SC adds a resilient single silicone rubber core to AIGI 26 packing. The elastic rubber core gives the packing better memory, allowing it to withstand radial shaft motion and vibration while maintaining excellent leakage control with minimal gland adjustment. As a low-friction packing, AIGI 26SC is an excellent choice as a general service pump packing. It is especially effective in pumps, mixers and agitators where radial runout is a problem.

Property

Value

Color

Black

Temperature

260°C (500°F)

PH Range

2 ~ 12

Speed

10m/s (2000 Ft/min)

Pressure

40kgf/cm² (580 PSI)

** Lab results for individual production lots tested; some variability will occur.*

Application

General service pump, agitator and mixer packing where radial runout is an issue
