

Super Slurry Sealing Packing

AIGI SSSP Packing is braided using a mix of high carbon content carbon fibers and PTFE yarn and then finish lubricated with high quality graphite. The high temperature resistance strength, self-lubricating properties of high carbon fiber combined with the flexibility, chemical resistance and stuffing box conformability of PTFE fibers makes AIGI SSSP the optimal choice for slurry applications in industries such as mining, pulp and paper, metals processing and power.

Property

Value

Color

Black / Grey

Temperature

260°C (500°F)

PH Range

0 ~ 13

Speed

18m/s (3600 Ft/min)

Pressure

28kgf/cm² (400 PSI)

** Lab results for individual production lots tested; some variability will occur.*

Application

Virtually all pumps, mixers and agitators in most slurry applications
